TMSS...more features, more flexibility, less work, at no extra cost

now available!...

gsa's new tmss electronic bill of lading and on-line booking solution!

TMSS offers an efficient, cost-effective on-line booking solution to meet your current and future shipping needs. TMSS provides Internet access to GSA's highly competitive transportation rates, and offers a wide selection of approved transportation service providers (TSPs). *It is easy to book freight and household goods shipments on-line using new TMSS functions.*

The Office of Governmentwide Policy granted GSA, Federal Supply Service a deviation from 41 CFR §102-117 allowing them to use the electronic bill of lading (BL) within the TMSS system. *TMSS users can now book shipments on-line and prepare and issue an electronic BL that can be viewed by shippers and TSPs.* TMSS provides the flexibility that allows customers to prepare a BL on-line even when circumstances require booking a shipment off-line. The original BL can be downloaded, printed, and submitted to a TSP to accompany a shipment. TMSS offers a secure transportation solution with a complete audit trail of the booking and BL process.

It's just the beginning...more TMSS innovative functions such as prepayment auditing, shipment tracking, claims resolution, and payment of transportation bills are coming this fall. We

want TMSS to be your complete end-to-end transportation management solution. For significant transportation savings, go to our web site at moveit.gsa.gov and use TMSS to Move It!

The FSS' Transportation Program Office offers ongoing TMSS training for agencies and TSPs – at our site or yours. Contact Raymond Price for more information on training at 703-305-7536 or raymond.price@gsa.gov.

For additional information about TMSS, please contact your GSA representatives:

GSA Federal Supply Service

going... going... gone!

GSA is pleased to present
GSA Auctions™.

Bid “live” auctions, on-line with lots of items within specified timeframes. We make it easy! At bid closing, GSA will honor the highest bid received.

This new state-of-the-art technology streamlines the business process and allows greater flexibility and speed for the introduction of enhancements. It reduces your administrative costs, increases market penetration, and maximizes the return on your investments. Getting rid of your excess property won't get any easier than this.

GSA Auctions™ presents a major shift in the strategy for selling property that the Government no longer needs. In the past, surplus sales have been conducted at regional locations utilizing traditional sales methods such as sealed bids and on-site auctions. This new on-line version will allow GSA to offer assets located across the country to any interested buyer, regardless of location. In addition, we will be able to access a larger segment of the general public, which should result in more competitive sales prices and a greater return for the Government.

We will provide guidance for property disposal, special handling requirements, time thresholds for moving property, and advise you about property available for reuse.

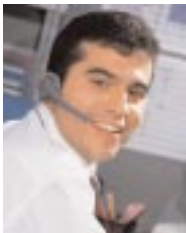

For more information or to register, call (703) 605-5610 or visit www.gsaauctions.gov

Why IT Installers Like Ordering Parts From Us, Even After They've Met Their 3% SDV Goal

While Government Customers & Contractors may initially see us as a way to fulfill the newly-legislated 3% goal for Service-Disabled veteran owned businesses (SDVs), we strive to be the best IT materials supplier you've ever worked with.

Here is what you can expect from us.

1. Helpful People On the Line

When you call for materials, you get more than just order takers on the phone. You get people who are graduates of BISCI installer training programs, with EIA/TIA standards manuals at their fingertips. You interact with experts who are continually educated in new technologies and their proper application, which invariably saves time and money.

2. Manufacturers Who Bend Over Backwards for Us, and You

We have cultivated strong relationships and loyalties with our manufacturers. They know and trust us. We know and trust them. Mistakes happen, but when trust is strong, it's amazing what people will do for each other to make it work, or make it right.

3. What You Need, When You Need It

Whether you're a government agency or government contractor, you want to deal with people who serve your needs better than anyone else in the industry. That's how we want to be regarded. This means if you need something "yesterday" that exceeds our inventory, we will not rest until we get it for you. Whether we cash in an I.O.U. with a loyal manufacturer or refer the order to a competitor, the most important thing for us is to get you what you need, when you need it.

4. A Heritage of Family Values

We started as a family company, and we continue to treat our suppliers and customers like family. When relationships involve trust, respect, high ethical standards, and service above and beyond the call, everybody wins.
